

Recursion Level - 1.

1) n to 1.

```
function (num) {  
    if (num < 1) return;  
    print(num);  
    function (num-1);  
}
```

2) Print 1 to n

```
function (num) {  
    if (num < 1) return;  
    print(num) function (num-1);  
    print(num);  
}
```

3) Factorial of a number

```
function (num) {  
    if (num <= 1) return 1;  
    return num * ans(num-1);  
}
```

4) Sum of N to 1

```
function (num) {  
    if (num == 1) return 1;  
    return num + ans(num-1);  
}
```

(5) Sum of Digit in numbers

```
function (num) {  
    if (num < 10) return num;  
    return (num % 10) + ans(num / 10);  
}
```

6) Product of digit in Number

```
function (num) {  
    if (num < 10) return num;  
    return (num % 10) * ans(num / 10);  
}
```

(7) Reverse A numbers.

rev = 0

function (num, rev)

- if (num == 0) return rev;

return ans (num/10, rev*10 + num%10);

}

(8) Is palindrome or not.

Now Here;

function (num) {

return num == (reverse of num);

}

find reverse of number from question 7.

(9) Count no of zero in a number

function count ans (num) {

if (num == 0) return 1;

return count (num/10, 0);

}

function counter (num, count) {

if (num == 0) return count;

if (num%10 == 0) count++;

return counter (num/10, count);

}
